

SACHIN PARETA

DevOps / Cloud & Platform Engineer | Kubernetes, CI/CD Automation & AI-Native Systems

Pune, India | +91-8233445584 | sachinpareta22@gmail.com

[linkedin.com/in/sachin-pareta-091469b3](https://www.linkedin.com/in/sachin-pareta-091469b3) | github.com/pareta22

PROFESSIONAL SUMMARY

Results-driven DevOps / Cloud Engineer with 5+ years of experience across cloud environments, specializing in Kubernetes, Docker, Helm, Terraform (Infrastructure as Code), and CI/CD pipeline automation using Jenkins, Bamboo, GitHub, and Bitbucket. Strong track record supporting production, non-production, and QA environments through release management, infrastructure provisioning, P1-P4 incident troubleshooting, and RCA. Skilled across cloud compute, networking, storage, security, databases, monitoring, backup/recovery, and automation. Effective cross-functional collaborator with Development, QA, CX, and Architecture teams, focused on reliability, deployment consistency, and operational efficiency through automation and DevOps best practices.

CORE COMPETENCIES

Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform (GCP), Azure DevOps
Cloud Services: Compute (EC2, Azure VMs, GCE) | Network (VPC, VNet, Subnets, Routes) | Storage (S3, Azure Storage, GCS) | Databases (RDS, Azure DB, Cloud SQL) | Security (IAM, RBAC, SGs, NSGs)
Containers & Orchestration: Kubernetes, Docker, Helm, OpenShift, Pods, Deployments, Services, CronJobs, ConfigMaps
CI/CD & Automation: Jenkins, Bamboo, GitHub, Bitbucket, Git, Terraform, Ansible, IaC, Release Management
Monitoring & Observability: CloudWatch, Azure Monitor, GCP Monitoring, Dynatrace, ELK, Prometheus, Grafana
Security & DevSecOps: TFSec, SonarQube, TruffleHog, Vulnerability Scanning, Security Groups, NSGs, IAM, RBAC
Incident & Service Management: ServiceNow, Jira, ITIL, P1-P4 Incident Handling, RCA, SLA Management, Change Management
AI & GenAI: OpenAI APIs, GenAI Fundamentals, LLMs, RAG, Agentic AI, Vector Databases, LangChain, Ollama, MCP

PROFESSIONAL EXPERIENCE

DevOps Engineer **Jan 2025 - Present**

NCSI Technology | Pune, India

Project: SubMarketplace - Singtel Singapore

- Executed 20+ production deployments per month across Dev, Non-Prod, and Production cloud environments via Helm releases and container image updates, maintaining 98.5% deployment success rate and zero-downtime rollbacks.
- Supported twice-weekly CI/CD release cycles using Bamboo, Jenkins, GitHub, and Bitbucket, reducing average build-to-deploy time by 30% and cutting failed-build incidents by 25%.
- Managed Kubernetes workloads (Pods, Deployments, Services, CronJobs, ConfigMaps, Helm Charts) across 6 clusters supporting 40+ microservices, improving application availability to 99.9%.
- Administered cloud infrastructure as code using Terraform (modules, remote state, providers) across 5 environments, reducing manual provisioning time by 40% and eliminating configuration drift incidents by 35%.
- Managed core cloud capabilities spanning compute, networking, storage, identity, load balancing, monitoring, and container registries for 25+ applications with 99.9% monthly uptime.
- Monitored infrastructure using cloud monitoring and logging, Dynatrace, and ELK Stack, reducing mean-time-to-detect (MTTD) by 30% and enabling proactive resolution of 150+ alerts per month.
- Resolved 30+ P1-P4 production incidents per month through RCA and cross-team coordination, reducing mean-time-to-resolution (MTTR) by 35% and improving SLA compliance to 98%.
- Managed Jira and ServiceNow queues covering 100+ tickets per month (incidents, changes, releases), maintaining 95% on-time SLA closure rate.
- Performed SQL/PostgreSQL data analysis supporting 25+ incident investigations and provisioning validations per month, cutting root-cause identification time by 40%.
- Administered GitHub/Bitbucket source control for a team of 8 engineers, reviewing 40+ pull requests per month under established branching strategies.
- Leveraged Generative AI tools to accelerate log analysis, SQL development, and RCA documentation, reducing incident documentation time by 30%.

LTIMindtree - Builders FirstSource | Pune, India

- Monitored cloud resources and applications via centralized monitoring and logging across 150+ instances, maintaining 99.9% system availability.
- Configured and managed cloud networking (VPCs/VNets, Subnets, Security Groups/NSGs, NACLs, Route Tables, NAT/Internet Gateways) supporting 4 production environments with zero security-related outages.
- Managed cloud storage (object, block, and file storage) totaling 50+ TB, ensuring 99.9%+ data durability and availability.
- Executed backup and recovery operations for 100+ resources, achieving 99% successful recovery validation rate and supporting disaster-recovery RTO/RPO targets.
- Troubleshoot cloud infrastructure and application issues, resolving 40+ tickets per month and reducing recurring incidents by 20%.

LTIMindtree - OTIS Elevators | Pune, India

- Managed Azure infrastructure (VMs, VNets, Subnets, NSGs, Storage Accounts, Managed Disks) supporting 100+ production workloads with 99.8% uptime.
- Configured Azure networking (VNets, NSGs, Route Tables) enabling secure connectivity across 3 environments with zero network-security incidents over 18 months.
- Managed Azure Storage (Blob, File Shares, Managed Disks) totaling 30+ TB, maintaining 99.9%+ availability and access-control compliance.
- Monitored 80+ Azure VMs for health and utilization, reducing unplanned downtime by 25% through proactive maintenance.
- Resolved 50+ incidents and service requests per month using ITIL processes, achieving 97% SLA compliance.
